Haskins Company - Greenville, SC / Remote

- Designed and developed WordPress solutions for clients
- Migrated styling from CSS2 to CSS3
- Developed custom plugins to assist clients with specific needs
- Followed SEO strategies to raise clients' page ranking

Projects:

Short Mail.io

ShortMail is a project that I designed and built throughout 2017. ShortMail is a service that will generate a temporary email address such as *foo@shormail.io*, and seamlessly redirect emails sent to that address to another email address.

DEEDRA

DEEDRA is a web application that I built for Ropak Manufacturing, which allows the engineering team to track and manage electrical and mechanical drawings. Prior to DEEDRA, the team resorted to tracking the drawings' ID and information with a shared spreadsheet. DEEDRA was finished in January, 2015, and has been running since then.
